

Jin+Ja expands into plant-based nutrition

25 July 2017 | News

Jin+Ja, the deliciously powerful health and wellness brand founded in 2009, announces the launch of Jin+Ja Super Greens, a new non-GMO, vegan and paleo plant-based nutrition aimed to help customers achieve optimal health through its proprietary blend of beneficial antioxidants, premium fatty acids and detoxifying herbs and plants.

Jin+Ja Super Greens is the brand's first new product line in eight years and serves as a natural and complementary expansion to its already well-known and flagship product, Jin+Ja Drink.

Jin+Ja, the deliciously powerful health and wellness brand founded in 2009, announces the launch of Jin+Ja Super Greens, a new non-GMO, vegan and paleo plant-based nutrition aimed to help customers achieve optimal health through its proprietary blend of beneficial antioxidants, premium fatty acids and detoxifying herbs and plants.

Jin+Ja Super Greens is the brand's first new product line in eight years and serves as a natural and complementary expansion to its already well-known and flagship product, Jin+Ja Drink, a revitalizing elixir packed with a mix of fresh ginger, cayenne, lemon, mint and green tea.

Positioned as the complete superfood combination, Jin+Ja Super Greens is the easiest and most effective way to drink yourself healthy enabling customers to consume the ideal amount of essential greens, antioxidants, fatty acids and natural detoxifiers each day resulting in a clean body and high-performance.

To experience maximum benefits, individuals should mix one scoop of the raspberry and blueberry flavored blend with eight ounces or more of water, juice or smoothie up to three times per day.

The company partnered with its network of health and nutrition experts to help bring the product to life. Jin+Ja Super Greens is currently available for pre-order exclusively online.
