Africa Food Manufacturing exhibition took place on 2-4 August at Egypt International Exhibition Center, Cairo. It is the largest food manufacturing exhibition in Egypt and North Africa. Angel Yeast attended this exhibition by providing bakery solutions & clean label seasoning ingredients solutions.

During the exhibition, Angel Yeast has promoted home-use bakery products, bakery ingredients and Umami/Xian taste yeast extract series products, which have good reviews and acceptance by customers.

Angel yeast Egyptian plant is one of the largest yeast plants in Egypt and MEA areas. It has the first bakery yeast extract production line in Africa. The participation of this exhibition not only increases the MEA market's acknowledgment of baker's yeast and yeast extract but also highly increases the influence of Angel yeast in the whole MEA area food market.

Angel YE (yeast extract) made from edible yeast, by degradation the protein and nucleic acid in the yeast cells into nutritional seasonings with the application of modern biotechnology, has the advantages of increasing the fresh flavor, reducing salt, balancing the odor, strong tolerance and food properties, which promotes the global healthy operation of salt reduction and "clean label".
