Pazzi Robotics launched fully automated solutions for F&B industry

06 January 2022 | News

Pazzi Robotics, a French kitchen software and robotics startup, recently announced the launch of fully-automated packaged solutions for the Food and Beverage (F&B) industry. The solutions range from food preparation to final assembly, based on fully-automated procedures performed by robots.

The fully-autonomous restaurant uses Pazzi, a pizza robot, throughout the entire cooking process. No human intervention in the kitchen.

Pazzi Robotics, a French kitchen software and robotics startup, recently announced the launch of fully-automated packaged solutions for the Food and Beverage (F&B) industry. The solutions range from food preparation to final assembly, based on fully-automated procedures performed by robots.

Pazzi Robotics launched their second automated pizzeria in Paris in summer 2021. The fully-autonomous restaurant uses *Pazzi*, a pizza robot, throughout the entire cooking process. No human intervention in the kitchen.

The global food robotics market is expected to reach $3.1 billion by 2025. The pandemic has made the implementation of autonomous solutions in the F&B industry even more important, as it helps to effectively manage human resources and minimize contamination risks. With Singapore moving towards Industry 4.0, the Government has come up with several initiatives to increase AI adoption in businesses, with numerous applications in robotics. Pazzi is a good example of how advanced robotics can help to deliver higher efficiency and safety in F&B.

Pazzi Robotics has spent 7 years to develop a disruptive and proprietary solution that combines software, data and precision robotics for fully automating the kitchen process end-to-end, from ingredients selection to finished quality dishes. It aims to help the F&B industry address challenges such as staff shortage, resource management and productivity, hygiene and safety, value and quality to consumers. The pizzas from Pazzi restaurants in Paris are highly rated by consumers.

Pazzi Robotics is backed by Qualgro, a venture capital firm based in Singapore and Partech, Daphni two leading European VCs.
