ICEX Spain, the government agency responsible for promoting Spanish firms internationally, has announced the launch of the Restaurants from Spain certification program in Singapore for the third year. Following the success of the 2021 launch, the program aims to further promote and support Spanish restaurants in Singapore, recognising their efforts in promoting authentic Spanish gastronomy.

This certification program ensures that Spanish restaurants meet specific quality standards and are recognised as authentic ambassadors of Spanish cuisine in Singapore. The certification process includes a rigorous evaluation of the restaurant's menu, wine list, service, and overall dining experience. It is valid for one year and is assessed on an annual basis to ensure that certified restaurants maintain the program's high standards and continue to offer an authentic Spanish dining experience to the customers.

Restaurants from Spain is launching a communication campaign to further promote the certified restaurants in Singapore by reaching out to key influencers and media outlets and sharing exciting news from the restaurants.

To date, a total of 16 Spanish restaurants in Singapore are certified by the program and have received the Restaurants from Spain diploma from the Ambassador of Spain in Singapore. LUMBRE has joined the list of certified establishments in 2023, further enhancing the diverse and vibrant Spanish culinary scene in Singapore.
