The company is now exploring the world of guava, a fruit highly anticipated by the Singapore market

Re.juve Cold Pressed Juice Singapore is proud to announce the launch of its latest beverages, Beat Guava and Green Guava, both guava juices. Staying true to Re.juve's commitment to delivering delicious, healthy, and honest drinks (#GOODforYou), the company is now exploring the world of guava, a fruit highly anticipated by the Singapore market.

Nicholas Johannes, Director of Re.juve, remarked, "With Beat Guava and Green Guava, we're not just launching new products, we're introducing a whole new experience. Moving away from the thicker, heat-blended texture of traditional guava smoothies, our juices celebrate the light, refreshing essence of cold-pressed guavas. Harvested from our very own crystal guava farm in Indonesia, these juices have a clarity of flavour and nutrients that smoothies simply can't match."

Re.juve's guava juices are made exclusively from 100 per cent organic vegetables and fresh fruits, without the use of concentrates. They are also free from added sugar, water, and preservatives. Beat Guava is a mix of crystal guava, organic beetroot, and fresh pineapple, while Green Guava combines crystal guava, organic spinach, and fresh pineapple.
