This initiative is a significant step towards offering healthier and more innovative beverage alternatives

Re.juve to introduce Singapore's first true cold-pressed juice vending machine at Tanglin Mall. This vending machine, located at Level B1 next to Market Blue and opposite B for Bagel, reflects our commitment to making it effortless for customers to access delicious, healthy, and honest drinks that are #GOODforYou.

This initiative is a significant step towards offering healthier and more innovative beverage alternatives. Re.juve's juices are made exclusively from 100 per cent organic vegetables and fresh fruits, without concentrates. Offering high nutritional values in each bottle, they are also free from added sugars, water, and preservatives.

"Our mission has always been to be readily available where our customers are, offering them healthier choices wherever they are," says Nicholas Johannes, Director of Re.juve. "This launch at Tanglin Mall, known for its focus on fitness and wellness, perfectly matches our vision." The presence of wellness-oriented tenants like Vive Active Pilates, Ambience Yoga, and Platinum Fitness aligns well with our mission.
