Rescence Laboratory, a leading longevity supplement provider in Hong Kong, announced the launch of Rescence EYE Optima, a revolutionary eye supplement designed to strengthen the eyes and combat age-related eye diseases, including presbyopia. This groundbreaking supplement combines extensively researched AREDS2 formula from the West with the latest clinical findings on the reversal of presbyopia using time-tested traditional Chinese medicine ingredients from the East, providing comprehensive support for eye health.

Rescence operates on the belief that achieving an excellent health span and long lifespan is possible by establishing a solid foundation of regulated cellular and organ health, nurturing a healthy microbiome through mindful eating, and supplementing with missing nutrients. Following the success of their flagship products - Rescence Trio Pure NMN 15000, Pure RSV Resveratrol 15000, and Pure SPD Spermidine 15000, which come in pure extract powder form and effectively address all 12 hallmarks of ageing by promoting cellular and organ health, Rescence EYE Optima is now launched to offer superior eye care to individuals seeking to maintain optimal vision as they age, minimising the ageing effects on their eyes.
