Coco Robots to start delivering on Uber Eats inÂ Los Angeles

Coco Robots to start delivering on Uber Eats inÂ Los Angeles

Uber and Coco announced a strategic partnership to launch Coco's sidewalk robots on Uber Eats, starting in Los Angeles this week and expanding to more cities in the months to come. This partnership with Uber builds on Coco's existing relationships with hundreds of merchants in the Los Angeles area.

"We're thrilled to partner with Uber to expand our services to even more customers," said Zach Rash, co-founder and CEO of Coco. "With our rapidly growing fleet, we're in a unique position to bring unprecedented scale to this partnership and deliver the benefits of sustainable and affordable robot delivery to more customers around the world."

"We're excited to welcome Coco's sidewalk robots on Uber Eats to enhance the delivery experience for both our merchants and customers," said Noah Zych, Global Head of Autonomous Mobility & Delivery at Uber. "As we continue to popularise robot delivery in Los Angeles, our partnership with Coco drives us another step towards a more sustainable and autonomous future for delivery."

Coco has a fleet of over 1,000 emissions-free robots, which are designed to be an effective and affordable option for merchants. Coco's service is already available inÂ FinlandÂ andÂ Los Angeles, California, in neighbourhoods such asÂ Santa Monica,Â Venice, West LA,Â Westwood,Â West Hollywood,Â Hollywood, Downtown LA, Koreatown, and University Park. Coco is planning to expand across the US andÂ EuropeÂ with thousands of additional robots in the coming months.
