The two-story facility features Pudu Robotics' FlashBots, ensuring quick, efficient, and precise meal delivery

Food Bayana, a new food hub in Bayan Lepas, has partnered with Pudu Robotics and Pentamaster Corporation Berhad to revolutionise its operations. This collaboration marks a significant step in Food Bayana's digital transformation, seamlessly integrating advanced automation with diverse, mouthwatering cuisine to deliver an unmatched dining experience.

As Malaysia's first fully automated food hub, Food Bayana has redefined the dining landscape. It has gathered 31 of Penang's finest hawkers into a two-story facility that spans over 2,000 square meters. The two-story facility features Pudu Robotics' FlashBots, ensuring quick, efficient, and precise meal delivery.

Pentamaster Corporation Berhad was key in deploying Pudu Robotics' FlashBots at Food Bayana. With its expertise in automation, Pentamaster collaborated with Pudu Robotics to design and implement a system customised to the premier food plaza's needs.

This collaboration has reduced labour costs, minimised human contact, and ensured hot, fresh meal delivery, meeting the demands of Penang's fast-paced industrial district.
