

HunterLab unveils next-gen ColorFlex L2 Spectrophotometer

20 December 2024 | News

This cutting-edge device is set to redefine colour accuracy and user experience in quality control processes across a variety of industries

This cutting-edge device is set to redefine colour accuracy and user experience in quality control processes across a variety of industries

HunterLab, a global leader in colour measurement technology for over 70 years, announces the launch of the ColorFlex L2 Spectrophotometer/Colorimeter. This cutting-edge device is set to redefine colour accuracy and user experience in quality control processes across a variety of industries.

The ColorFlex L2 is designed to elevate colour confidence with its modern smart interface, sealed spill-proof case, and powerful standalone functionality that eliminates the need for a PC. This innovative spectrophotometer/colorimeter is compact, ergonomic, and built to withstand the demands of busy lab environments.

The HunterLab ColorFlex L2 offers a seamless transition from the widely trusted and relied upon ColorFlex EZ, with the same xenon light source and 45°/0°, annular illuminated optics. Users can easily transfer their ColorFlex EZ standards and data to the new ColorFlex L2, ensuring continuity and enhanced performance without any interruptions.
