Natural Grocers introduces range of organic soupsÂ

03 January 2025 | News

All six varieties are Certified Organic, non-GMO and crafted with entirely plant-based, gluten- and dairy-free ingredients

All six varieties are Certified Organic, non-GMO and crafted with entirely plant-based, gluten- and dairy-free ingredients

Natural Grocers, America's largest family-operated organic and natural grocery retailer announced the introduction of six new varieties of savoury delicious soups to its collection of Natural Grocers Brand Products. All six varieties are Certified Organic, non-GMO and crafted with entirely plant-based, gluten- and dairy-free ingredients.

Sustainability, premium quality and affordability are principles behind every Natural Grocers Brand Product, including these varieties of organic soups. Each is packaged in BPA-free pouches designed with resource efficiency in mind, offering a lightweight alternative to glass jars or cans that helps reduce energy use during production and transportation. But don't forget about the flavour and convenience!

Raquel Isely, Vice President of Marketing at Natural Grocers, states, "We are thrilled to introduce six new soups to our shelves nationwide. From classics like Creamy Tomato and Butternut Squash to bold, outside-the-pouch flavours like Sauerkraut and Sweet Corn, there's something for everyone to enjoy. These convenient 14 ozs. packets are perfect to keep at home or take on the go for an easy lunch or quick meal. Just heat, serve, and savour one of life's most comforting foodsâ??all at an Always Affordable PriceSM."
