

Comprehensive microbiome nutrition: Solaray's Mycrobio Complete hits market

13 August 2025 | News

Innovative blends of prebiotics, probiotics, and postbiotics with advanced delivery technology enhance gut health

Innovative blends of prebiotics, probiotics, and postbiotics with advanced delivery technology enhance gut health

Solaray has launched Mycrobio Complete, a cutting-edge line of supplements integrating prebiotics, probiotics, and postbiotics into a single capsule, designed to support optimal gut health and holistic well-being. These formulations address the complex needs of the microbiome, recognizing its critical role in digestion, immune function, mood regulation, and cardiovascular health.

The supplements utilize Solaray's proprietary Enteric Shield technology within VegCaps capsules, ensuring the survival of probiotics through stomach acid and their targeted release in the intestines. This enteric protection maintains probiotic viability for at least 60 minutes, maximizing colon absorption and interaction with the gut microbiota. Notably, Mycrobio Complete products ship without refrigeration, remaining stable for up to 14 days at room temperature, with refrigeration recommended upon receipt to preserve probiotic potency.

The line includes seven tailored formulations addressing diverse consumer needs, such as Women's for total microbiome and vaginal health; Ultimate Potency for microflora rebuilding and respiratory support; Adult 50+ targeting digestion, cardiovascular health, and stress; Men's focusing on heart and fat loss support; Mood for cognitive health and stress relief; Active supporting exercise and cardiovascular function; and Postnatal catering to postpartum wellness including breastfeeding and mood support.

As consumer interest in gut health and microbiome science intensifies, Solaray's Mycrobio Complete offers an innovative, convenient solution to meet complex nutritional demands in a single, effective product line.
