Atomin Innovations appoints Dr Ram Nimmaguda as Lead â?? Innovation & Strategic Partnerships

07 April 2026 | News

His expertise spans scientific affairs, regulatory strategy, intellectual property execution, and global business development

His expertise spans scientific affairs, regulatory strategy, intellectual property execution, and global business development

Atomin Innovations Group, along with its network companies Molecules Biolabs, Akore Formulations, and Padmalife Nutrition, announced the engagement of Dr Ram Nimmaguda as Lead â?? Innovation & Strategic Partnerships (USA).

Dr Ram brings over three decades of extensive experience in the nutraceuticals and functional foods industry. He has held senior leadership roles with globally recognised organisations including Glanbia Nutritionals and DSM, where he contributed to advancing innovation, strategic growth, and commercialisation of science-backed ingredients.

His expertise spans scientific affairs, regulatory strategy, intellectual property execution, and global business development. Throughout his career, he has been instrumental in translating scientific insights into market-ready solutions and building strong industry partnerships across international markets.

With deep domain knowledge in nutritional sciences and functional ingredient development, Dr Ram has worked extensively

with global teams, particularly in the United States, enabling innovation-driven growth and regulatory alignment.

On his appointment, Dr Ram said, â??I am excited to be a part of the Atomin group to support the growth of their technologies; the disruptive technology platforms deployed to address the functional restrictions of ingredients is very interesting. Looking forward to working with the team to bring out innovative product solutions.â?

Dr. Sreeraj Gopi, Founder & MD â?? Atomin Innovations,Â said, â??Having known Ram for many years, I can confidently say his experience is invaluable. His association strengthens our global innovation vision.â?Â

Based in Texas, USA, Dr Ram will lead the group's strategic partnerships, new product innovation, and global market expansion, with a specific focus on strengthening presence in North America and fostering cross-border collaborations.

This engagement reflects Atomin Innovations Groupâ??s vision of building a globally integrated scientific and innovation ecosystem, connecting research, advanced delivery technologies, and commercialisation through its network of specialised companies.

Atomin is a research, innovation and manufacturing platform that collaborates with food, nutrition, and beverage companies to develop innovative technologies.
